

## **Professional Cut-Off Saw Diamond Blades Offered by Shindaiwa**

After extensive research in the field of cut-off saw technology, Shindaiwa now offers 12” and 14” diameter heavy-duty diamond cut-off saw blades engineered to deliver superior cutting performance in dry or wet applications.

- The high performance, long-lasting **Red Label** diamond blade features a hard, wear resistant segment bond ideal for cutting cured reinforced concrete, soft brick, blocks, pavers, and roofing tiles.
- The high performance **Blue Label** diamond blade employs a slightly softer segment bonding material for super fast cutting of cured reinforced concrete, hard brick, and blocks.
- The **Grey Label** diamond blade is designed specifically for cutting asphalt and green concrete. It has wide gullets for increased air and water cooling and an extremely wear-resistant bond.
- The **Green Label** diamond blade is designed for general-duty applications. A good choice for professionals who use a cut-off saw only occasionally, or for less experienced operators.

All Shindaiwa precision balanced cut-off saw blades feature superior-quality diamonds for excellent cutting performance, laser welded segments, and the highest quality bonding method for maximum durability. And, a versatile diamond blade mounting system allows the operator to simply press in / press out arbors for installing Shindaiwa diamond blades on machines with 20mm, 22mm, or 25.4mm arbors.
